- Exposure to state of art dental materials and equipments.
- Personalized attention due to small group size.
- Case presentation & group discussions.

Additional Benefits:

- IDA Certified Course.
- E-Folders of cases done during the course.
- Online mentorship by expert faculties post completion.

Registration Intake:

- Maximum intake of participants - 12
- The course is extremely competitive and applications exceed the number of places available each batch.
- A 'first-come-first-serve' rule is followed while allotting seats, so early application to the waiting list is encouraged.

Financial Benefits:

- Payment flexibility - Book your seat with an amount of Rs 10000 only and the rest can be paid in fixed installments until the 3rd week of the course.

About The Programme

The 'Comprehensive Clinical Residency Programme' (CCRP), is an extensive, renowned, 5 weeks-long programme conducted at IDA Head Office, Mumbai, which provides ambitious dental professionals with a steady foundation to evolve clinical skills/dexterity for better patient care, thereby, advancing their career.

This IDA-certified programme supports your work with state-of-the-art infrastructure, giving you ample opportunity to treat multiple patients and handle the most advanced materials and technology. This ensures enhancement of an individual's horizon for future developments and growth in the field of dentistry

Course Curriculum

Didactic Module:

The Programme begins with the Didactic module where Clinically relevant discussions with the faculty further emphasizes on the knowledge received in the lectures. With this method of learning, the student understands the significance of each treatment protocol with practical implications. A series of pre-clinical exercises, practiced on simulation phantom head units are scheduled which will help the student gain the skills and confidence to treat patients effectively.

Clinical Module:

The program promotes excellence by providing dental graduates extensive training on patients. Since the pattern of clinical training will be 'over-the-shoulder' with expert mentorship, participants will be able to do as many comprehensive treatments as they please within the assigned programme duration.
